Swiss Premium Beds

## The best of three worlds – integrated into a single sleep system. Wrapped in Pure Natural Comfort.

Swissflex has been developing premium-quality sleeping solutions for people with high expectations for over 60 years. The brand combines a fascination with the luxury of sleep with the pursuit of perfection.

Out of sheer passion for innovation, Swiss engineering and excellent craftsmanship, we have created pure and exclusive natural comfort: exciting, impeccable and with more than a touch of luxury.

For exquisite night-time comfort, Swissflex coordinates all the different elements to create a comprehensive sleep system. Premium mattresses are perfectly balanced with sophisticated slat bases and, combined with bed frames, top layers and cushions, create maximum individual sleeping comfort.

Currently, the Swissflex® Box, Swissflex® Hybrid Collection and Swissflex bridge® system show what defines 'pure natural comfort' when it comes to sleeping.

# The Comfort of Swissflex® Hybrid Mattresses

## Simply feel wonderful all over!

The comfort mattresses of the Swissflex® Hybrid Collection combine the advantages of innerspring and foam technologies to create a unique sleeping experience.

In addition, the hybrid system creates a perfect interplay between the mattress and the slat base, as the zones on the mattress and slat base are perfectly adapted to each other.

This balance between pressure relief and support creates a unique experience of luxurious comfort.

The sophisticated innovation of the Swissflex® Hybrid Collection presents top-of-the-line pure, natural comfort – featuring the finest-quality fabrics and materials and impeccable workmanship. The new Swissflex® Premium mattresses make you feel like you are being carried by a cloud.

Healthy sleep occurs in cycles, during which your body goes through various regeneration and processing stages. While you sleep, your brain processes the experiences of the day. We unconsciously recall, sort and organise new learning experiences before storing them in our long-term memory.

The light sleep stage is followed by the deep sleep stage, which is the most restorative of the various stages of sleep. This is when our body is motionless and completely relaxed.

With its ergonomic, high-quality sleep systems, Swissflex is making a valuable contribution to healing, restorative deep sleep stages, helping you to start off your day right.

# Swissflex® Hybrid Collection

## Like being carried by a cloud

The Swissflex® Hybrid Collection creates a unique comfort experience by integrating different technologies adopted from other industries. Swissflex® innovation combines the benefits of the slat base and foam

technologies to create unique ergonomic qualities. Our top layers are available in three fabrics, from which you can choose. These top layers are integrated into the mattress so you can control your personal comfort preference.

### Swissflex® top layers

For the more economical SF Hybrid 24 model, the height of the top layer has been reduced to 4 centimetres and is connected to the basic core. The two options available are GELTEX® inside and memory foam.

### GELTEX® inside

Supporting comfort and ventilation

### Latex

Snug and cosy warmth

### Visco

Pressure relief and ventilation

For the SF Hybrid 26 model, three different top layers are available – you can choose your personal, preferred sleep comfort from GELTEX® inside, Latex and memory foam.

### Swissflex® Slat Bases – Luxury Bedding

The ultimate sleep comfort is completed by the coordinated interplay of the various parts of the body in the mattress and slat base.

The self-regulating Swissflex bridge® spring system adapts completely to every movement of the hybrid mattress and follows it like a shadow. Relief and support, exactly where you need it. This luxury product is available with four different slat base models, as well as in the new Swissflex® Box with its integrated bridge® system.

## Swissflex® covers

Swissflex® mattress covers are available in two designs – with and without quilted sheep's wool. Both types of covers are washable.

### Swissflex® covers pure wash

Allows for close contact with the top layer – also suitable for those who suffer from allergies.

### Swissflex® covers wool wash

Mattress cover fabric quilted with washable sheep's wool enhances the feeling of softness and comfort, while the moisture regulation of the wool improves the quality of the sleep surface.

| Lengths/widths | 80 cm | 90 cm | 95 cm | 100 cm | 120 cm | 140 cm | 160 cm | 180 cm | 200 cm |
|----------------|-------|-------|-------|--------|--------|--------|--------|--------|--------|
| 190 cm         | x     | x     | x     | x      | x      | x      | x      | x      | x      |
| 200 cm         | x     | x     | x     | x      | x      | x      | x      | x      | x      |
| 210 cm*        | x     | x     | x     | x      | x      | x      | x      | x      | x      |
| 220 cm*        | x     | x     | x     | x      | x      | x      | x      | x      | x      |
